POST TREATMENT INSTRUCTIONS FOR PDO/PLLA SUTURES

For optimal results with PDO/PLLA treatments at New Image Works med spa, it is essential to carefully read these instructions. By signing below, you confirm that you have reviewed them in full and understand the importance of notifying our office immediately if you experience any unexpected side effects or abnormalities not listed. Your safety, comfort, and treatment success are our top priorities.

TREATMENT RESULTS

- It may take a minimum of two plus weeks for treatment results to be noticeable.
- Minor bruising and swelling is normal and to be expected.
- Lumps and/or bumps may temporarily occur at or along treatment site(s). These will resolve with time and are seldom a cause for concern.
- Minor pain at injection site is normal and to be expected. Pain may last up to week post treatment.
- Asymmetry and irregularity of tissue treated is common post treatment and usually resolves itself.

INSTRUCTIONS TO THE PATIENT

- Avoid exercise for 24 hours after treatment.
- Diligently follow your practitioner's instructions with use of antihistamines if you are prone to seasonal allergies.
- If you experience sever weather or dramatic atmospheric pressure changes in your geographic location, you may experience greater than normal swelling or complications.
- Avoid excessive chewing and hard foods for 3 days post treatment. Do not drink from the straw.
- Avoid animated facial expressions for a week post treatment.
- To avoid additional swelling, sleep with head elevated for 2-3 days post treatment.
- Avoid massaging treatment areas excessively.
- Avoid washing your face for 12 hours following treatment.
